## PROJECTS

- **AI based Assessment App System**, The app-based assessment system for people with disabilities (PWD) uses React Native to provide accessible, user-friendly interfaces for evaluating skills and needs. It includes voice feedback, intuitive navigation, and adaptive assessments tailored to different disabilities.
- **Marine Debris Detection**, The marine debris detection project utilizes satellite imagery combined with a machine learning model to automatically identify and track floating debris in oceans. This system helps in monitoring pollution and supporting marine conservation efforts.
